Dry-cleaning manual

Every drop-off tracked, no notebook

Every drop-off has its numbered ticket, every customer is notified on WhatsApp, and both the advance and the balance are counted on the day the money comes in.

- ✓ **A ticket per drop-off**
- ✓ **Late items in red**
- ✓ **Notified on WhatsApp**
- ✓ **Advance or pay later**

01

Before you start

Your services and prices

Washing, ironing, dry cleaning: each job becomes an item with its price. Since you sell work and not goods, there is no stock to count.

1. Open **Stock**, then tap **« Ajouter »** (add).
2. Give it a clear name: **Shirt washed and ironed**, **Suit dry cleaning**, **Sheet or blanket**...
3. Type the **Prix de vente** (selling price). Under **Catégorie** (category), put **Services**.
4. Turn on **« C'est un service (pas de stock) »** (it's a service, no stock), then **« Enregistrer »** (save).
5. Tick **« Favori »** (favourite) for the most requested services: they show first at the till.

« C'est un service »: it sells without counting stock.

One price per piece

Make one service per type of piece (shirt, trousers, dress...): the ticket lists everything, and your reports show what earns the most.

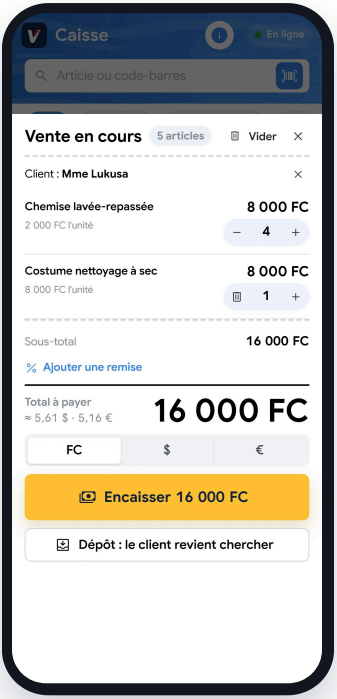

02

The customer arrives

Taking in the clothes

The customer puts the bag on the counter. Count the pieces together and add them to the till like a sale.

1. Open **Caisse** (till) and tap each service once per piece: 4 shirts means 4 taps.
2. Open the cart and pick the customer under **« Ajouter un client »** (add a customer), or create them with their number.
3. Check the total with them.
4. Tap **« Dépôt : le client revient chercher »** (drop-off: the customer comes back).

The « Dépôt » button appears when the cart holds only services.

The customer pays and leaves with it?

A quick ironing, for example: just tap « Encaisser » (collect payment), like a normal sale.

The drop-off

03 Note what they leave, and the pickup day

In a few seconds the drop-off is recorded: who, what, for when, and what is already paid.

1. **Client** (customer): their name and number are used to notify them on WhatsApp.
2. **Ce que le client laisse** (what the customer leaves): colours, brands, stains, missing buttons. These details prevent disputes at pickup.
3. **À retirer le** (pickup on): tap **Demain** (tomorrow), **Dans 3 jours** (in 3 days) or **Dans 1 semaine** (in 1 week), or pick the date.
4. **Le client paie** (the customer pays): **Tout payé** (all paid), an **Avance** (advance: type the amount), or **Au retrait** (at pickup).
5. Tap **« Encaisser »** (collect), or **« Enregistrer le dépôt »** (save the drop-off) if they will pay at pickup.

With an advance, the balance shows right away.

The customer's ticket

It shows right away, numbered: « Imprimer le ticket » (print) or « Envoyer le ticket » (send) on WhatsApp. Write its number on the clothes tag.

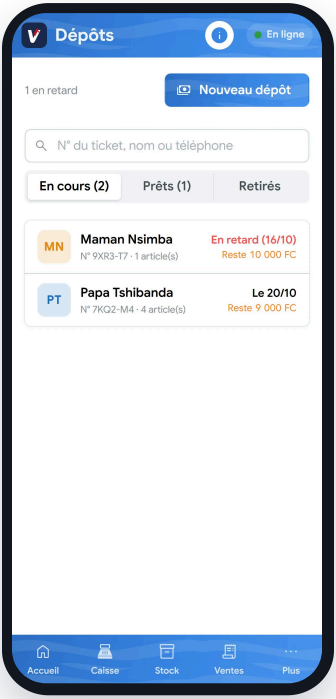

04

Day by day

Know where every drop-off stands

No more flipping through a notebook: the Dépôts screen shows what is in progress, what is ready, and who is late.

1. Open **Dépôts** (drop-offs), in the **Plus** (more) menu on a phone.
2. **En cours** (in progress): clothes to clean. **Prêts** (ready): waiting for the customer. **Retirés** (picked up): already returned.
3. Late drop-offs are **in red**, with the promised date.
4. Customer without their ticket? Type their **name**, **phone** or the ticket **number** in the search.

The balance of each drop-off, at a glance.

Every morning

Check the « En cours » tab: you know what must be ready today.

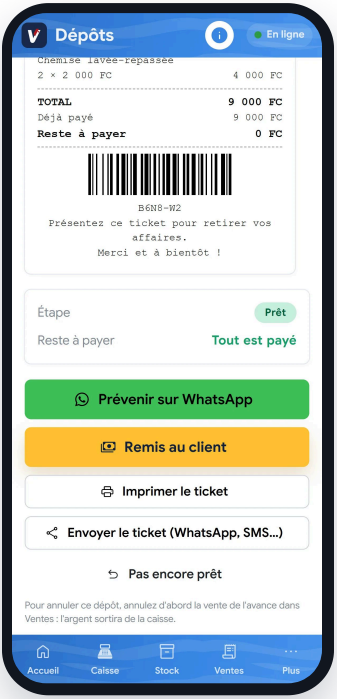

05

It's ready

Notify the customer on WhatsApp

The job is done: one tap to record it, another to notify the customer. They know the balance before they come.

1. Open the drop-off and tap **« C'est prêt »** (it's ready).
2. Tap **« Prévenir sur WhatsApp »** (notify on WhatsApp): the message is already written, with the drop-off number and the balance.
3. Send it in WhatsApp, that's all.
4. Marked ready by mistake? **« Pas encore prêt »** (not ready yet) puts it back in progress.

The message goes from your own WhatsApp.

The customer comes back

06 Collect the balance and return the clothes

The customer shows their ticket. Collect what is left, and the sale appears in the day's cash.

1. Find the drop-off in **Dépôts**: type the ticket number, the customer's name or phone.
2. Tap **« Retrait : encaisser »** (pickup: collect).
3. Choose **Espèces** (cash) or **Mobile money**, and the currency. Tap the note given: the change shows.
4. Tap **« Encaisser et remettre »** (collect and hand over), then return the clothes. Already fully paid? Tap **« Remis au client »** (handed over).

The advance already paid is deducted automatically.

In the evening

The day's advances and balances are in « Journée de caisse » (cash day): the drawer adds up.

Your questions

I run a dry cleaner and a shop (soap, perfume…). How does it work?

Everything goes in the same business, each in its own category. A customer buys a product and leaves clothes? Collect the product first, then make the drop-off.

The customer wants to pay later?

At pickup, yes: choose « Au retrait » (at pickup). But the clothes stay with you until payment: this is not credit, nobody leaves without paying in full.

I made a mistake on the advance.

The manager or owner cancels the advance sale in Ventes (sales), on the same day: the money leaves the till and the drop-off goes back to « nothing paid ».

The customer doesn't come for their clothes.

Their drop-off turns red. Open it and send the WhatsApp message again.

The customer has no phone.

The drop-off still works: find it later by name.

Need help?

On every screen, the « i » button explains what to do. And our team answers on WhatsApp.
