21 A PROBLEM?
Answers to common questions

The app is in French: button names are shown as they appear on screen « … », with their meaning in brackets.

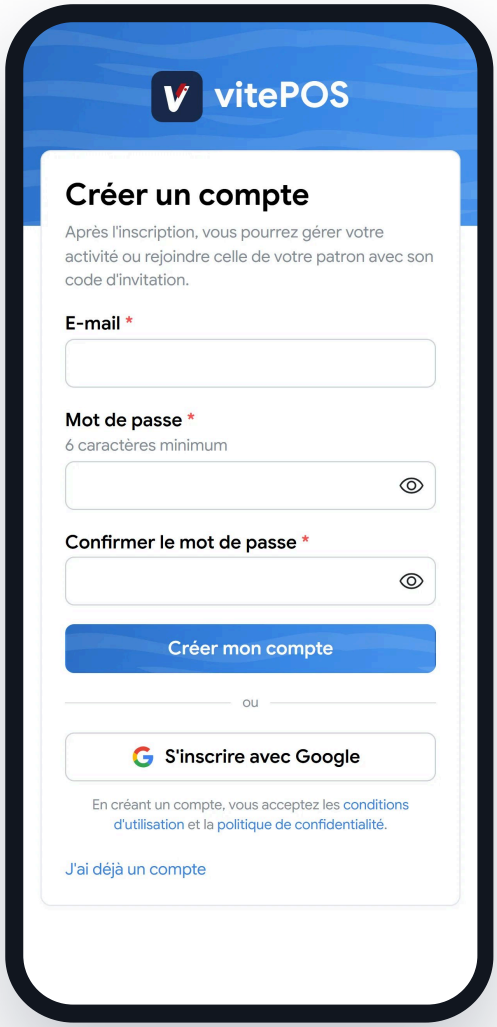

01

GETTING STARTED

Create your account

An email and a password, or your Google account: that's all. Everyone who uses vitePOS has their own account, you and your sellers alike.

1. On your phone, open **app.viteposrdc.com** in the browser: Chrome on Android, Safari on iPhone.
2. Tap the yellow button **« Créer un compte gratuit »** (create a free account).
3. With an email: type your **E-mail**, a **Mot de passe** (password) of at least 6 characters, type it again under **« Confirmer le mot de passe »** (confirm), then tap **« Créer mon compte »** (create my account).
4. With Google: tap **« S'inscrire avec Google »** (sign up with Google) and pick your account. No password to remember.
5. The **« Bienvenue »** (welcome) screen opens: your account is ready. All that's left is to create your business (next page).

With Google, no password to remember.

Tip · An email you actually read

If you forget your password, « Mot de passe oublié ? » (forgot password) sends a link to this address to choose a new one.

Watch out · One account per person

Don't create a single account for the whole team: each seller creates their own, then joins your business with your code (chapter 03).

02

GETTING STARTED

Your till ready in 5 minutes

No software to buy, no app store: vitePOS opens in your phone's browser, then installs on the home screen like a real app.

1. On the « **Bienvenue** » screen, keep « **Gérer mon activité** » (manage my business). (« Rejoindre », join, is for your employees.)
2. Type the **Nom de votre activité** (your business name, printed on your receipts) and **Votre nom** (your name).
3. Choose the **Devise des prix** (price currency: Francs, Dollars or Euros) and the **Taux du jour** (daily rate): how many FC for $1. Customers pay in euros? Tick « **J'accepte aussi les euros** » (I also accept euros).
4. The trial starts on the Pro plan, the most complete; « **Changer** » (change) to pick another. Tap « **Créer mon activité** » (create my business): on the home screen, the « **Premiers pas** » (first steps) list guides you to your first sale.
5. Install the app: the « **Installer vitePOS** » card on the home screen guides you (« **Installer** » button on Android, **Share** → « **Sur l'écran d'accueil** » in Safari on iPhone).

You can change the rate every day in Settings.

Tip · Internet to get started

You need a connection to create your account, your business and to invite your team.

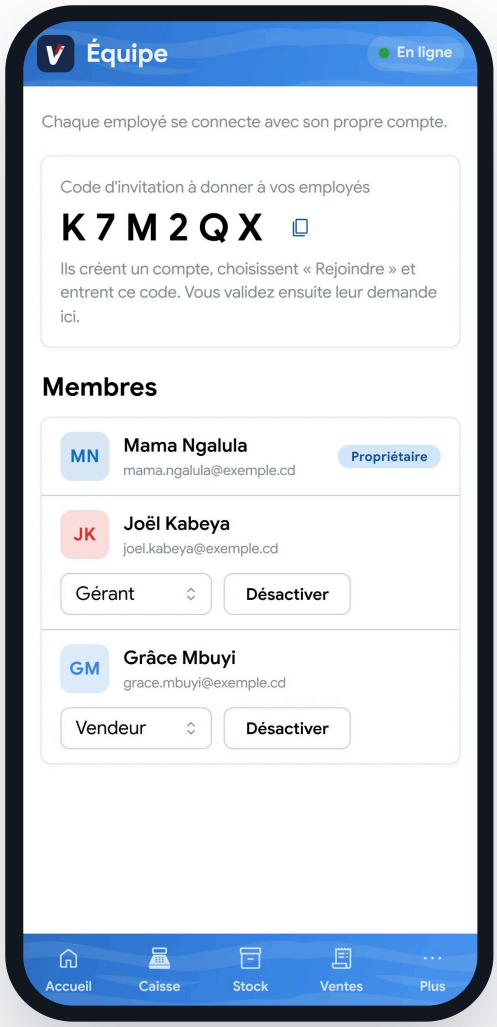

YOUR TEAM

03 Everyone has their own account and rights

Your sellers never use your account. Each one has their own: you know who sold what, and a seller sees neither your buying prices nor your margins.

1. Go to **Plus** → **Équipe** (more → team): you'll find the 6-character **invitation code**.
2. Your employee creates an account on their phone, chooses **« Rejoindre »** (join) and enters this code.
3. Their request appears under **« Demandes à valider »** (requests to approve): tap **« Valider »** (approve) or « Refuser » (decline).
4. They join **« Membres »** (members) as a seller: change their role to **Gérant** (manager) if needed.
5. An employee is leaving? Under **« Membres »**, tap **« Désactiver »** (deactivate): they can no longer open anything, and their sales stay in the history.

ROLE	SELLS	SEES REPORTS	CHANGES PRICES	CLOSES THE DAY	MANAGES STOCK
Owner	Yes	Yes	Yes	Yes	Yes
Manager	Yes	Yes	Yes	Yes	Yes
Seller	Yes	No	No	No	No

The invitation code can be copied and sent by WhatsApp.

Watch out · Don't lend your account

A sale made with your account is recorded in your name. For a new employee, give them the invitation code.

04

FRANCS, DOLLARS, EUROS

You set the daily rate

Your prices stay in your currency. The customer pays in francs, dollars or euros: vitePOS converts at the daily rate and works out the change.

1. Go to **Plus** → **Paramètres** (more → settings): the **Taux du jour** (daily rate) is the first block.
2. Next to **« 1 $ = »**, type how many francs one dollar is worth (for example 2,850), then tap **« Mettre à jour »** (update).
3. Customers pay in euros? Do the same next to **« 1 € = »**. Otherwise, leave it empty: the euro won't appear anywhere.
4. Under each rate, the app notes **« Mis à jour aujourd'hui à 08:15 »** (updated today at 08:15): you see at a glance if it dates from yesterday.
5. The new rate shows straight away on the home screen and at the till of all your sellers.

Only the owner can change the rate; sellers can see it.

Tip · Every morning

Update the rate before the first sale: yesterday's rate means money lost on every payment in dollars.

05

STOCK

Every item has its card

You fill in the card once: price, stock, barcode, packs. After that, vitePOS uses it for every sale.

1. In **Stock**, tap **« Ajouter »** (add). Choose the category: the **item code** is suggested automatically (LAI-001, LAI-002… for milks).
2. Scan the item's **barcode** with the camera button in the field, or type it.
3. Enter the selling price, the buying price, the unit (piece, kg or litre), the opening stock and the alert threshold.
4. You also sell wholesale? Under **« Emballages »** (packaging), tap **« Ajouter un paquet ou un carton »** (add a pack or carton): how many units it holds, its price and its own barcode.
5. Pharmacy, food? Turn on **« Suivre les dates de péremption »** (track expiry dates): one date per delivery, an alert 30 days before.
6. Phones? Turn on **« Numéro de série / IMEI »** (serial number / IMEI) and enter the warranty in months.

The pack of 24 has its own price and barcode. Stock is still counted in bottles.

Tip · Lots of items?

Don't type them one by one: import your Excel list in one go (chapter 06).

06

SAVE TIME

Import your Excel list

Your items are already in an Excel file? Import them in one go instead of typing them. Easiest: from a computer, with the same account.

1. In **Stock**, tap **« ... »** → **« Importer depuis Excel »** (import from Excel), then **« Télécharger le modèle »** (download the template).
2. Open the template in Excel and fill in one row per item. Only the **name** and the **selling price** are required; add the category, buying price, stock, alert threshold and barcode if you like.
3. In Excel, use **File** → **Save as** and choose the **CSV** format.
4. In vitePOS, tap **« Choisir un fichier CSV »** (choose a CSV file): the app shows how many items will be created or updated. Check, then tap **« Importer ... produits »** (import ... products).

« Essayer avec l'exemple » (try the example) shows the result without saving anything.

Tip · No duplicates

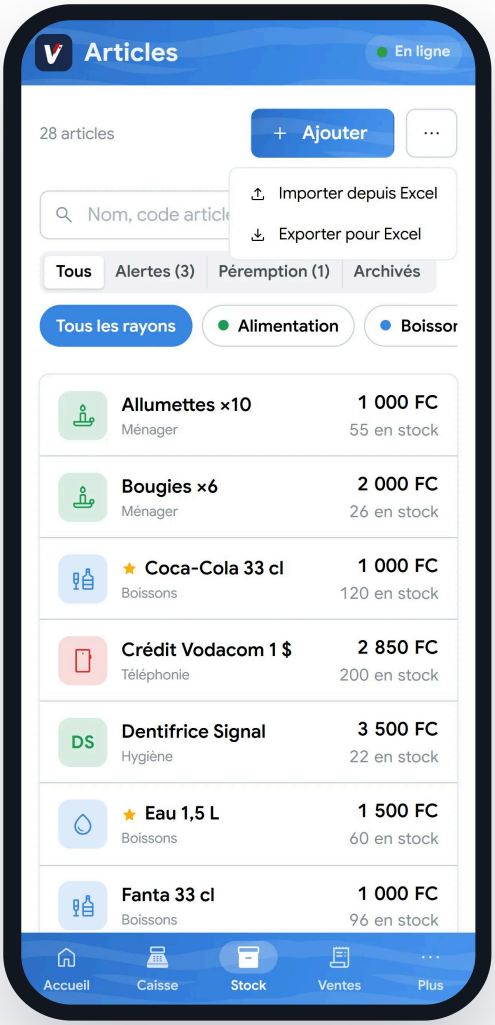

An item that already exists (same barcode, or same name and category) is updated, not created twice. If the stock column is filled in, it replaces the old stock and the difference is recorded.

DAY-TO-DAY STOCK

07 Change a price, tidy up, find things

A price going up, an item you no longer sell, a list to send to your accountant: it's all done from Stock.

1. **Change a price**: tap the item, change the selling price, then **« Enregistrer »** (save). The new price applies from the next sale, on every till.
2. The filters at the top: **Alertes** (low stock), **Péremption** (batches expiring within 30 days) and **Archivés** (archived). The section pills sort by category.
3. An item you no longer sell? Open it and tap **« Archiver »** (archive): it disappears from stock and the till, its history is kept. **« Restaurer »** (restore), from the Archived filter, brings it back.
4. Tick **« Favori »** (favourite) for your best sellers: they show first at the till.
5. To send your list to your accountant or rework it: **« ... »** → **« Exporter pour Excel »** (export for Excel).

The « ... » menu: import or export your list.

Tip · The right alert threshold

Set « Alerte stock bas à partir de » (low stock alert from) to what you sell in 3 or 4 days: you have time to restock before running out.

08

DELIVERIES

Receive goods in seconds

The supplier delivers cartons? Scan the carton: vitePOS adds the units to your stock.

1. In **Stock**, scan the barcode **of the pack**.
2. The **Mouvement** (stock movement) window opens on **« Réappro »** (restock), counted in **« Paquet de 24 »** (pack of 24).
3. Type **3**: the app shows « 3 × 24 = 72 unités » and the stock afterwards. Tap **« Enregistrer le mouvement »** (save the movement).

Tip · Everything is tracked

Every entry and exit is recorded in the item's « Historique » (history) tab, with the person's name and the time.

Breakage, gifts or corrections are done in the same window.

09

IN THE MORNING

Open the day

Before the first sale, record the money put in the drawer to give change: in the evening, vitePOS will know what should be in it.

1. Go to **Plus** → **Journée de caisse** (more → cash day).
2. Under **« Fond de caisse »** (float), enter the amounts in FC, $ and, if needed, €.
3. Tap **« Enregistrer le fond de caisse »** (save the float).

« Argent dans le tiroir » (money in the drawer) updates with every sale and expense.

10

AT A GLANCE

Your day on a single screen

As soon as you open the app: how much you've sold today, and whether it's better than yesterday at the same time.

1. **« Recette du jour »** (today's takings): total sales since this morning, in large type. A seller sees **« Vos ventes du jour »** (your sales today): only their own.
2. Just below, the comparison **« … % de plus qu'hier à la même heure »** (… % more than yesterday at the same time): at 11 am, it compares with yesterday at 11 am, not the whole of yesterday.
3. Below the dotted line: the number of **Ventes** (sales), the **Panier moyen** (average basket: what a customer spends on average) and the **Bénéfice estimé** (estimated profit), each with its change.
4. **« Quand vous vendez »** (when you sell): one bar per hour, the current hour in blue. The sentence below gives your busiest hour.
5. Further down, **« À surveiller »** (to watch: items to reorder, batches expiring soon) and the **« Dernières ventes »** (latest sales) with the time, customer and amount.

The yellow « Nouvelle vente » (new sale) button opens the till.

Tip · When to add staff?

« Quand vous vendez » shows your busy hours: that's when to have two people at the counter.

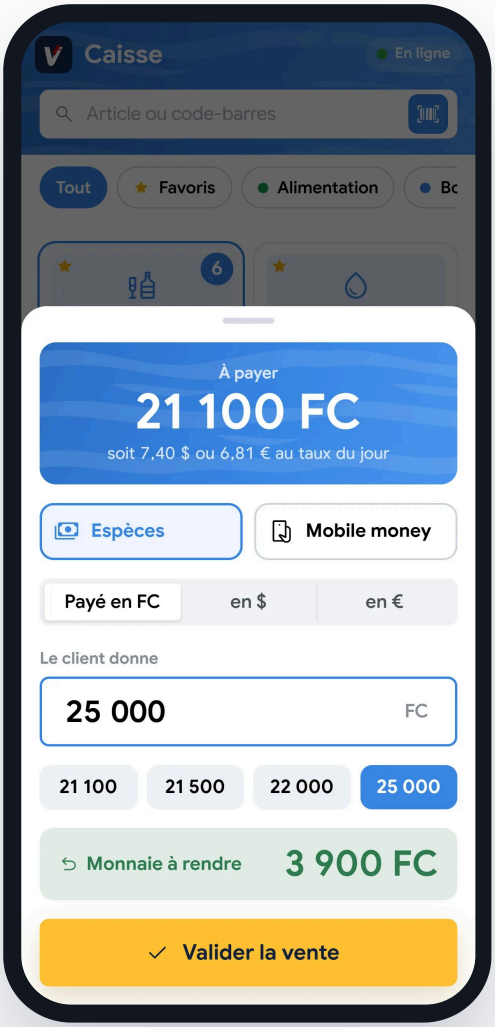

11

SELLING

Take payment in seconds

Tap or scan the item, take payment in the customer's currency, hand over the receipt.

1. In **Caisse** (till), tap the item or scan it: with the camera (button to the right of the search) or with a barcode scanner. A blue badge shows how many are already in the cart; low stock shows in orange (« 4 restants », 4 left).
2. An item also sold by the pack? The app asks **« À l'unité »** (single) or **« Paquet de 24 »** (pack of 24). Scanning the pack sells the pack directly.
3. A phone tracked by IMEI? The app asks **which device**: scan the IMEI on the box or pick it from the list. The receipt will print the IMEI and the end of warranty.
4. On a phone, tap **« Panier »** (cart) in the bottom bar (on a computer, it's on the right): **−** and **+** for quantities, a discount in %, a customer if you want to track their purchases. Then the yellow **« Encaisser »** (take payment) button.
5. Choose **Espèces** (cash) or **Mobile money**, then the currency: **Francs**, **Dollars** or **Euros**. Tap a suggested note or type the amount received: the app shows **« À rendre »** (change due). Tap **« Valider la vente »** (confirm the sale).

The customer gives 25,000 FC: the app works out the 3,900 FC change, even if they pay in dollars.

12

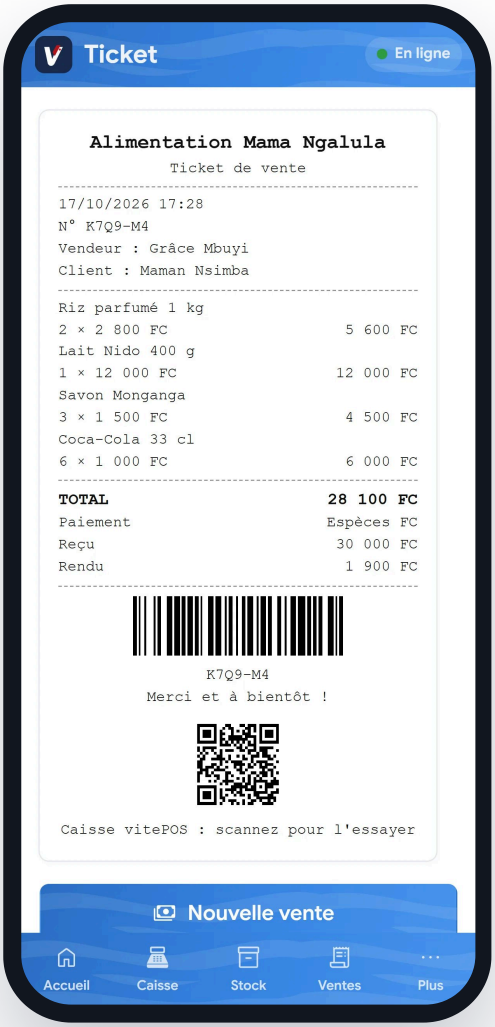

AFTER THE SALE

The receipt, printed or sent

Every sale has its receipt and its number. The customer gets it on paper or on their phone.

1. After « **Valider la vente** », the receipt appears: « **Imprimer** » (print) on a receipt printer, or « **Partager (WhatsApp, SMS…)** » (share).
2. A mistake? The manager or owner taps « **Annuler la vente** » (cancel the sale) the same day, with a reason: the items go back into stock.

> **Watch out · Nobody can erase a sale**
>
> A cancelled sale stays visible, marked « annulée » (cancelled), with who cancelled it and why.

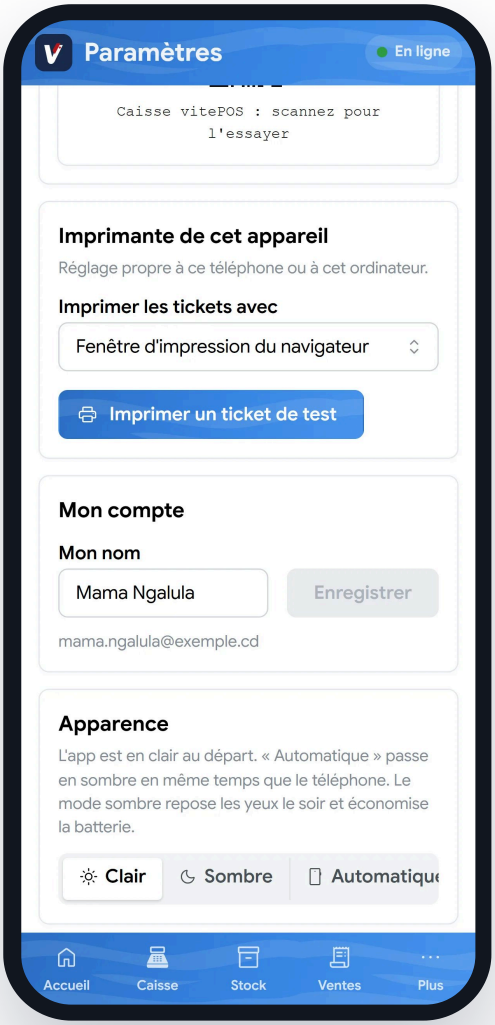

« Nouvelle vente » (new sale) takes you back to the till.

PAPER RECEIPTS

13 Connect the printer and customise the receipt

A small Bluetooth or USB receipt printer is enough. Your logo, address and QR code print on every receipt.

1. In **Plus** → **Paramètres** → **Imprimante de cet appareil** (this device's printer), choose **« Imprimer les tickets avec »** (print receipts with): Bluetooth printer, USB printer (computer), the **RawBT** app on Android or **Thermer** on iPhone.
2. Switch the printer on, tap **« Choisir l'imprimante »** (choose the printer) and select it. Then **« Imprimer un ticket de test »** (print a test receipt).
3. In **Mon activité** (my business), choose the **paper width** (58 mm or 80 mm) and, if you like, **« Imprimer le ticket automatiquement après chaque vente »** (print automatically after each sale).
4. In **Ticket de caisse** (receipt): **« Ajouter un logo »** (add a logo), address, phone, RCCM, ID NAT, tax number, a **QR code** (WhatsApp, Facebook…) and the **closing message**. The preview updates as you type.

Each phone or computer chooses its own printer.

Tip · No printer?

After the sale, « Partager (WhatsApp, SMS…) » sends the receipt to the customer's phone.

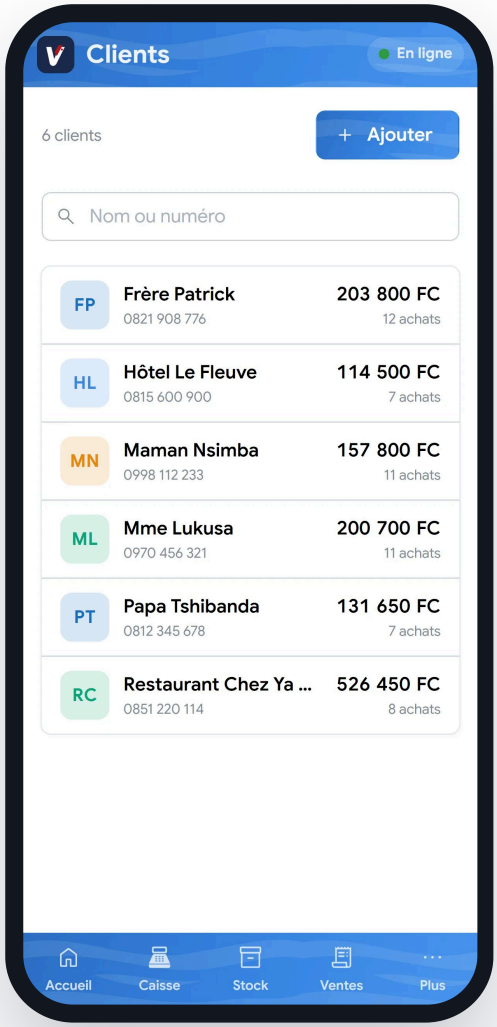

14

YOUR REGULARS

Know your loyal customers

Your regular customers, individuals or companies: record them once, and find everything they've bought.

1. In **Plus** → **Clients** (customers), tap **« Ajouter »** (add): name, phone and notes (habits, delivery address…).
2. Or straight from the till: in the cart, **« Ajouter un client »** (add a customer), then **« + Nouveau client »** (new customer).
3. The list shows the total spent and number of purchases for each one. Search by name or number.
4. Tap a customer: the **« Achats »** (purchases) tab lists their receipts, and **« Appeler »** (call) starts the call.

Your best customers stand out straight away.

15

MONEY GOING OUT

Record every expense

The moto-taxi, phone credit, the bag of sugar paid in a hurry: every expense recorded is one less hole in the till at night.

1. In **Plus** → **Dépenses** (expenses), tap **« Nouvelle dépense »** (new expense).
2. Enter the **amount** and its currency, the **category** and, if you like, a detail.
3. Leave **« Payée avec l'argent de la caisse »** (paid with till money) ticked if the money comes out of the drawer. Untick it if you paid out of your own pocket.
4. Tap **« Enregistrer »** (save).

Tip · A mistake?

Tap the expense, then « Annuler la dépense » (cancel the expense). It stays visible with the « Annulée » label and no longer counts in the till.

The receipt at the top separates money taken from the till and money paid outside it.

IN THE EVENING

16 Close the day with no surprises

VitePOS knows what should be in the drawer. You count, it compares: any gap stands out.

1. In **Plus** → **Journée de caisse**, look at **« = Attendu »** (expected): float + cash taken − expenses paid from the till.
2. Count the money in the drawer and enter it under **« Clôture »** (closing): **Compté en FC** and **Compté en $** (counted). A € column only appears if euros came in or went out that day.
3. As soon as you type, the **Écart** (difference) appears: green if the till is right, orange if there's too much, red if money is missing.
4. Add a note if needed, then tap **« Clôturer la journée »** (close the day).
5. The summary shows **Attendu**, **Compté** and **Écart**, and further down the sales **« Par vendeur »** (by seller).

The day is closed by the manager or the owner.

Tip · Mobile money apart

Mobile money payments aren't in the drawer: their total shows separately so you can compare it with the SMS you received.

Watch out · Money missing?

Check in this order: an expense not recorded, a sale not rung up, wrong change given. Too much money? Often a sale paid but not confirmed in the app.

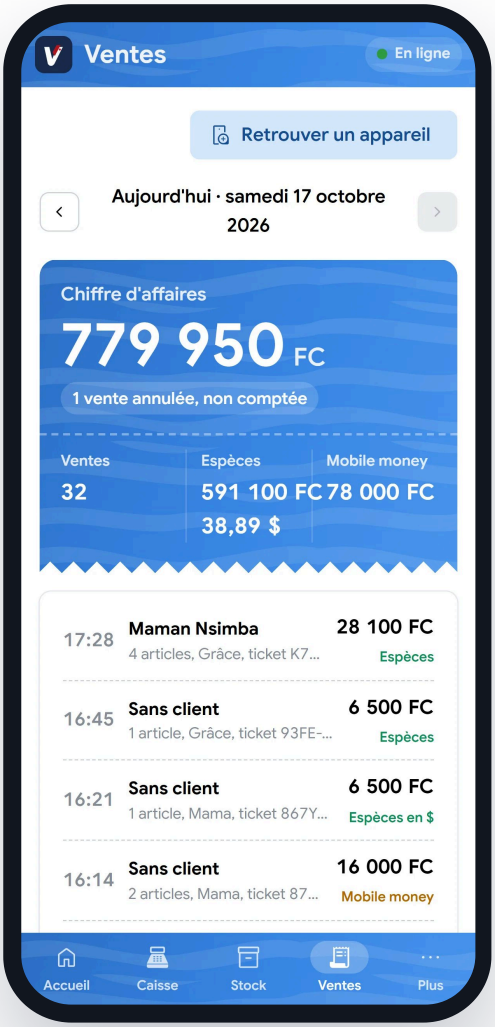

17

HISTORY

Find a sale

A customer comes back with a question, a lost receipt, a faulty device: every sale is there, day by day.

1. In **Ventes** (sales), the arrows at the top change the day. The blue receipt gives the **turnover**, the number of sales, **Espèces** (cash, one line per currency) and **Mobile money**.
2. Each line starts with the **time**, then the customer (or « Sans client », no customer), the seller and the receipt number.
3. A cancelled sale has the red **« Annulée »** label and doesn't count in the total.
4. You sell phones? **« Retrouver un appareil »** (find a device), at the top, looks up an IMEI: the sale, the customer and the end of warranty.

Tap a sale to see, reprint or resend its receipt.

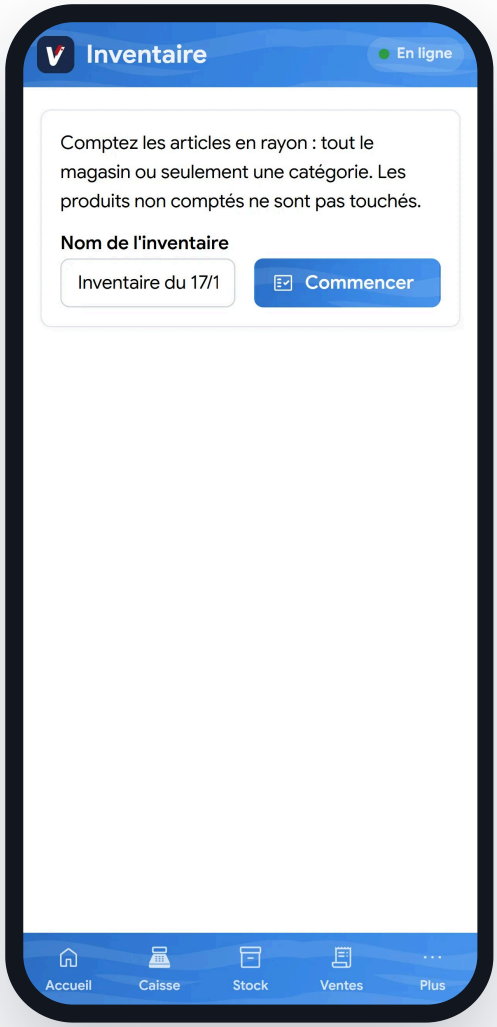

18

ONCE A MONTH

Stocktaking, shelf by shelf

Count what's really on the shelves, see what's missing and what it costs, before correcting the stock.

1. In **Plus** → **Inventaire** (stocktake), give it a name, choose the whole store or one category, then **« Commencer »** (start).
2. Scan or search each item and enter the quantity counted. Several people can count at the same time.
3. Tap **« Vérifier et valider »** (check and confirm): the app shows the differences and their value. **« Valider l'inventaire »** (confirm the stocktake) corrects the stock.

Sales made during the count are taken into account.

19

YOUR FIGURES

Reports, even from a distance

On your phone, wherever you are: what sold, what you earned, what sells best.

1. In **Plus** → **Rapports** (reports), choose **Jour**, **Semaine** or **Mois** (day, week, month) at the top, then the arrows to go back in time.
2. The blue receipt gives the **turnover** and how it compares with the previous period (« 12 % de plus que la période d'avant »).
3. Below: **Ventes** (sales), **Panier moyen** (average basket), **Bénéfice estimé** (estimated profit: sales minus buying prices) and **Dépenses** (expenses).
4. **Chiffre d'affaires par jour** (turnover per day): the curve for the week or month. **Meilleurs produits** (best products): the 10 that earn the most. **Moyens de paiement** (payment methods): cash, mobile money and discounts.
5. At the very bottom, **Ventes et dépenses, six derniers mois** (sales and expenses, last six months): a blue bar for sales, an orange one for expenses.

Reports and buying prices stay hidden from sellers.

Tip · An accurate profit

The estimated profit is only exact if every item has its buying price on its card. Otherwise, the report shows what share of sales it's based on.

YOUR PLAN

20 Pay and renew your subscription

The trial is free, with every feature. After that, you pay by mobile money, monthly or yearly (2 months free).

1. Go to **Plus** → **Mon abonnement** (my subscription, owner only): your plan and its end date.
2. Under **« Je paie pour »** (I'm paying for), choose 1, 3 or 6 months, or **1 an** (1 year): the amount appears.
3. Tap **« Payer via WhatsApp »**: the message is ready. We reply with the mobile money number to pay.
4. Send us the **reference** you received by SMS: the subscription is extended as soon as the payment is checked, and shows under **« Paiements reçus »** (payments received).
5. During the trial, you can still **change plan**, at the bottom of the screen.

The yellow button opens WhatsApp with the message ready.

Tip · Pay early

You don't lose a single day: the months you pay are added after the end date.

Watch out · What if I don't pay?

7 days before the end, a banner warns you; after it, you have 7 more days to pay. Then the app turns read-only: no sales, but your data stays viewable. Nothing is deleted; everything restarts once you pay.

A PROBLEM?

21 Answers to common questions

The questions we're asked most, with the solution.

1. **The printer won't print.** Check it's switched on, has paper, and that the phone's Bluetooth is on. Then Settings → **« Imprimer un ticket de test »** (print a test receipt).
2. **The barcode won't scan.** Wipe the label, light it up, or type the code into the till's search.
3. **I forgot my password.** On the sign-in screen, tap **« Mot de passe oublié ? »** (forgot password): you get an email to choose a new one.
4. **I can't see my seller's sales.** They arrive as soon as their phone has a connection. Their badge (their initials, top right) shows if any sales are still waiting to be sent.
5. **The network went down.** Keep selling: everything is kept on the phone and goes online by itself when the network is back. Two tills at the same time add up without overwriting each other.

Watch out · A sale « En attente d'envoi » (waiting to be sent)?

It's safely recorded and will go online when the network is back. Don't sign out while sales are still waiting: the app warns you.

END OF ISSUE

Now it's your turn to sell.

Open **app.viteposrdc.com** on your phone. A question? Message us on WhatsApp at +243 839 892 822: we reply, and we can come to you. To go faster, send your business name, a screenshot and what you were doing.
