vitePOS

TILL · STOCK · SALES

Sell faster.
Lose less.
Even offline.

Your shop's till, on your phone. Sales, expenses, profit: everything is worked out while you sell.

- ✓ **FC, $ and €** at the daily rate, exact change
- ✓ **Offline** keep selling when the network drops
- ✓ **Several tills** your staff sell at the same time

01

No more notebook.

vitePOS replaces the cash book: faster to sell, impossible to "forget", and readable from your phone.

02

Not a franc lost.

Every sale is recorded, stock counts itself, and in the evening you know exactly what should be in the till.

03

Your shop in your pocket.

Your sellers take payment, you see every sale and every missing item live, even when you are away.

Free to start

No hardware to buy · ready in 5 minutes · even offline

Everything to run your business

Fast checkout
Tap or scan items, take payment in francs, dollars, euros or mobile money. The app works out the change.

Receipts
Print the receipt on a thermal printer or send it to the customer by WhatsApp.

Clear reports
Sales and expenses over the last six months, best sellers, margin: all from your phone.

Easy stocktaking
Count a shelf by scanning, several people at once. The app shows what is missing and its value before correcting the stock.

Stock always right
Every sale lowers the stock. You are warned before running out and every movement is tracked.

Staff under control
Each seller has their own account. Sellers never see your purchase prices or margins, and a sale cannot be erased.

End of day, no surprises
Closing compares the money in the drawer with what was expected, in francs and dollars. Gaps stand out.

Import from Excel
Already have a product list? Import it in one go, even with thousands of items.

For every line of business

- Grocery and minimarkets
- Supermarkets
- Hardware and building materials
- Pharmacies and parapharmacies
- Drinks depots
- Wholesale and semi-wholesale
- Bakeries and pastry shops
- Cosmetics
- Car and motorbike spare parts
- Phones and accessories

In Kinshasa, Lubumbashi, Kolwezi, Matadi and across the DRC.

Ready in three steps

1. **Create your account**
   With your e-mail or Google account, from your phone's browser.
2. **Add your products**
   One by one, by scanning, or all at once from an Excel file.
3. **Sell**
   Invite your sellers with a code and follow everything from your phone.
